

# Land/Sea/Cloud/Waterscape

## **Trophies to be awarded are:**

***'The Olaf Peterson Trophy for Best Print'*** first presented in 1990 by Dave Riddleston in honour of Olaf Peterson (the club's Patron for many years).

***'The Ian Powell Trophy Best Projected Image'***

**Judging:** Landscapes will be judged under the club's normal competition rules for prints and projected images, using the rules & guidelines below. The trophy winners will be selected from the honour images.

A Landscape can be of or may include Land, Sea, Clouds and/or Bodies of Water and landscapes should be a selection or a portion of natural scenery as seen from the viewpoint of the author. Typically, people and animals are not generally shown, unless they are secondary to the view. Natural scenery should dominate the scene for it to be termed a 'Landscape'. A farm building, person, or animal may feature as a focal point, add relevance, or show scale in the scene, as too a road or pathway which may also be used in this way.

(Note: Cities, buildings or man-made structures shown as graphical elements of composition are generally not landscapes and should not be included.)
